

**Skateboard Park, Splash Pad and Playground Open at the
New Community Centre**

WEST LINCOLN, <August 30, 2018> - The skateboard park, splash pad and playground at the new Community Centre at 177 West Street in Smithville will open on August 31, 2018 at 6:00 p.m.

The Township of West Lincoln is thrilled to announce the opening of the three outdoor features at the new Community Centre, Library and Recreational Facility. The new skateboard park, splash pad and playground will all officially open on Friday, August 31, 2018 at 6:00 p.m. Access to the new features will be from the north side of the park via Westlea Drive or Swayze Court. As the main facility, including the arena, gym and library, is still a construction site, no access will be available from West Street (Regional Road 20) while construction continues.

The skateboard park was designed by New Line Skate and has a train theme built into its structures. It includes rails, pipes and bowls with a good combination of street plaza terrains and transition terrains. There is something for everyone at this skateboard park and visitors will not be disappointed.

The splash pad will be open from 9:00 a.m. to dusk during the summer months and will run on a 4 minute cycle of water splashing fun.

The new playground is accessible and includes features such as a periscope, swings, climbing apparatus, and two slides. The playground has been inclusively designed for all ages.

The area is still being worked on and visitors should be aware that seating areas have not yet been installed. If needed, visitors are welcome to bring their own seating; however, they are asked to stay off of the new sod while it is setting. Sod areas will be marked off limits during the setting period. Two shade structures have been included within the outdoor play area. Please enjoy your visit.

Construction on the rest of the New Community Centre, Library and Recreational Facility project is continuing on schedule and updates will be provided as it moves towards the final stages.

This is an exciting project for West Lincoln. With a vision of "Building a Vibrant Tomorrow", the Mayor and Council are excited about the benefits that our new Community Centre, Library and Recreational Facility project will bring to the community.
