

PUBLIC NOTICE

The North Chippawa Bridge located between Caistorville Rd and Abingdon Rd will be closed

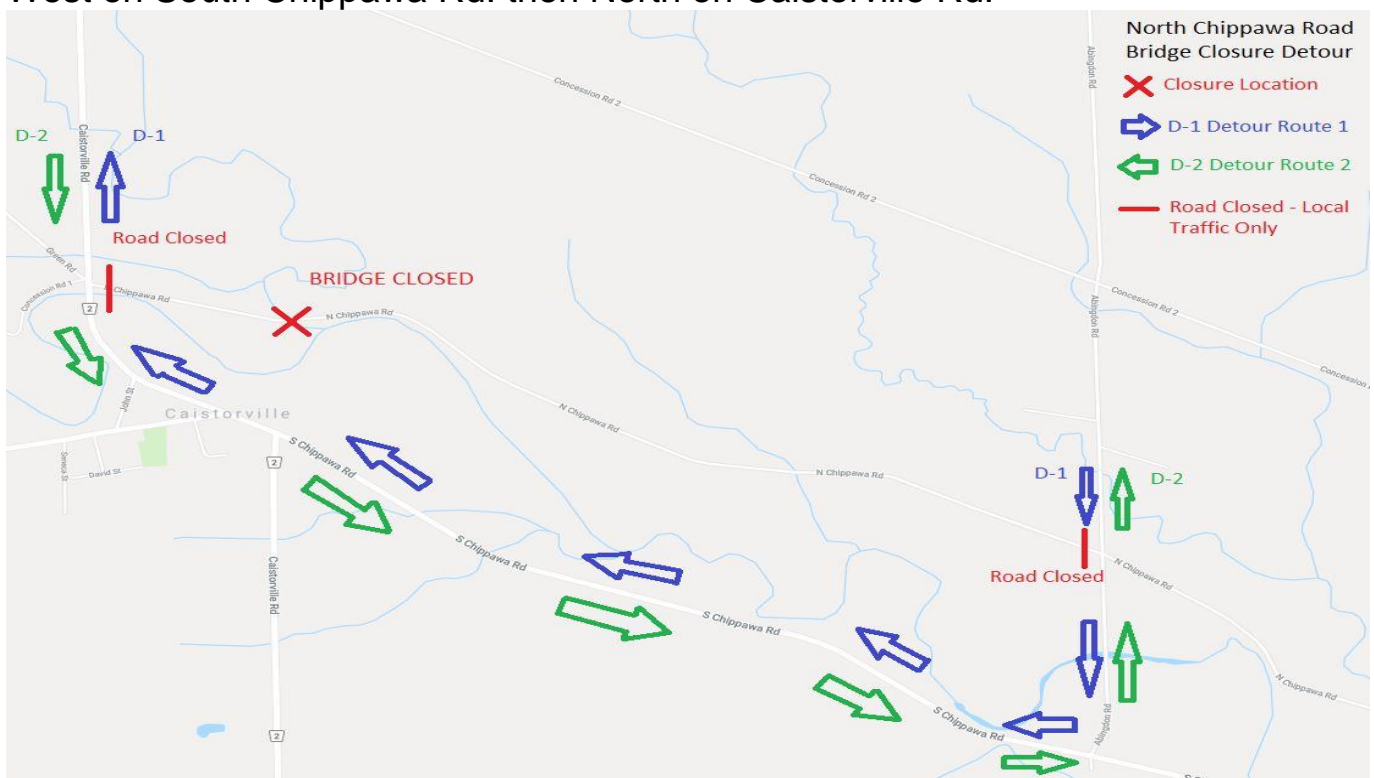

The Township's consulting Engineers have concluded that the North Chippawa Bridge is in an advanced state of deterioration, presenting a clear safety hazard. With the winter season coming up, the ongoing freeze/thaw action will accelerate the deterioration of the structural capacity of the bridge and pose a serious risk to the public. The bridge is no longer fit for vehicular traffic.

With public safety as our primary concern, the bridge is closed effective immediately to all vehicle traffic. All emergency services and bus companies have been notified.

The Township thanks residents for their patience and understanding and asks that the following Detour Plan be used:

East bound traffic on North Chippawa Rd. – detour South on Caistorville Rd. then East on South Chippawa Rd. then North on Abingdon Rd.

West bound traffic on North Chippawa Rd. – detour South on Abingdon Rd. then West on South Chippawa Rd. then North on Caistorville Rd.

If you have any questions regarding this closure, please contact Township of West Lincoln, Public Works Department at 905-957-3346 or Email: publicworks@westlincoln.com
