The Corporation of the Township of West Lincoln

2023 Annual Performance Report

January 1 to December 31, 2023

Ministry of the Environment, Conservation and Parks

ECA # 077-S701

West Lincoln Township Stormwater Management System – 2023 Performance Report

This report summarizes the annual performance of the West Lincoln Township Stormwater Management System (West Lincoln Stormwater System) in accordance with Environmental Compliance Approval #077-S701, Schedule E Condition 5.2 from January 1 to December 31, 2023.

Description of Stormwater Management System

The West Lincoln Township Stormwater Management System is a municipal stormwater management system which conveys stormwater to the final receiver, Lake Ontario.

The Stormwater Management System serving the Township of West Lincoln is a separate system for stormwater within the Lake Ontario watershed. The system consists of storm sewers, culverts, ditches, management facilities and outlets to Lake Ontario. All privately and regionally owned connections and systems, as well as any municipal drains (constructed under the Ontario Municipal Drainage Act) are not covered under the Town's CLI-ECA and are not discussed in this report. Overall, the system consists of conveyance pipe, ditches, and various treatment types including ponds and oil and grit separators before runoff is discharged to its final receiver in Lake Ontario. Much of the existing system has predated contemporary stormwater management standards, hence the Town is continuously evaluating opportunities to improve quality and quantity control of the system to lessen the impacts during major events.

The West Lincoln Stormwater System (Town owned) consists of approximately twenty two (22) kilometres (km) of conveyance pipe, sixteen (16) kilometres of ditches/swales, four (4) Oil and Grit Separators, and nine (9) Dry/Wet Storm Ponds.

Report Distribution

As required under Schedule E – Condition 5.3 of ECA 077-S701, the annual report will be available to the public at no charge on the Town's website or through Public Request by June 1^{st} of the reporting year.

Summary of Monitoring Data (if applicable)

The West Lincoln Stormwater System is overseen by the Public Works Department, with the Public Works Staff being responsible for the day-to-day operation and maintenance (i.e. mainline sewer flushing, ditch maintenance, small culvert installations/replacements, etc.) and the Engineering Division managing long term programs (i.e. annual facility assessments, assent condition assessments, rehabilitation programs, etc.).

Sewer Inspection Program

The Town completed a flushing and inspection program for the West Lincoln Stormwater System consisting of storm sewer mainline flushing and camera (CCTV) inspections. The purpose of these inspections is to identify infrastructure that have structural or other noted deficiencies. Information collected during the inspections is reviewed and analyzed by a CCTV contractor. An assessment condition rating report is provided to the Town to support future infrastructure repairs and replacement projects. Deficiencies found during the CCTV inspections are prioritized and addressed through rehabilitation programs.

Sewer Flushing Program

Semi-annual flushing is performed in areas of the system that have been identified as "problematic" through past incidents and inspections. Flushing is conducted using a hydrovac/water flushing truck. High-pressure, high-volume water and specially designed nozzles are used to clear the system of built-up debris that has the potential to reduce system efficiency. During the flushing program, operators inspect each maintenance hole that is being accessed for flushing. Any deficiencies that are identified are prioritized for future rehabilitation programs.

Summary of Monitoring Programs

Table A details the monitoring activities performed by West Lincoln staff during the reporting period. Based on the data collected and reviewed, it has been determined that the system is performing effectively and as designed. At this time there are no major modifications required for the collection system.

Table A – Summary of Monitoring Program

| Program Title | Program Description | Program Data from Reporting Period | Adverse Effects on the Natural Environment |
|---------------|--|---|---|
| Storm Sewer | Reactive flushing due | Approximately 500 metres of | |
| Flushing | to obstructions or | mainline sewer were flushed in | No |
| | other CCTV findings. | 2023 by the Town's contractor. | |
| Oil/Grit | Annual inspection | Post annual inspection, 4 OGS | |
| Separators | and cleaning program. Additional condition | units were cleaned in 2023. | No |
| | assessment project. | | |
| Ditches and | Routine inspections | Inspections performed during | |
| Culverts | and maintenance. | routine road patrols. Operational issues addressed as required. | No |

| Inlet and Outlet | Routine and pre/post | Staff performed inspections in | |
|------------------|----------------------|----------------------------------|----|
| Inspections | significant weather | response to weather report | |
| | event inspections | assessments. Post-event | No |
| | and maintenance. | inspections completed after all | |
| | | significant weather events. | |
| SWM Ponds | Routine inspections | Routine inspections were | |
| | and maintenance. | performed, and maintenance | No |
| | Additional condition | including seasonal management of | |
| | assessment project. | vegetation. | |
| | | | |
| | | Condition assessment completed | |
| | | for all Dry/Wet Ponds. | |
| Catch Basins | Annual inspection | All catch basins (447) were | |
| | and cleaning | inspected and cleaned in 2023. | No |
| | program. | | |
| CCTV Inspections | CCTV inspection | 1,900 metres of mainline storm | |
| | program. | sewer were inspected and CCTV in | No |
| | | 2023. | |

Operational Issues and Corrective Actions

All maintenance was performed on behalf of the Owner, by qualified Operators or qualified contracted service providers who exercise due diligence in ensuring the works, and the related equipment, are properly operated and maintained to achieve compliance with the Approval.

As noted in Table B, there were no operational issues identified during the reporting period.

Table B – Summary of Operational Issues and Corrective Actions

| Date | Description | Corrective Actions |
|------|-------------|--------------------|
| N/A | N/A | N/A |

Major Structure & Equipment Calibration, Maintenance and Repairs

Table C provides a summary of activities carried out on major structures and collection system works that were not covered under the operational issues section of this report.

Table C – Major Structure & Equipment Calibration, Maintenance and Repairs

| Major Structure or Equipment | Summary of Work performed in 2023 | |
|-------------------------------|---|--|
| Fall Arrest Equipment | All fall arrest and lifting devices were | |
| | inspected during the reporting period. | |
| Stormpond and OGS Inspections | All OGS, as well as Dry/Wet Stormponds | |
| | were inspected by a consultant. A condition | |

| | assessment was completed for all Dry/Wet Ponds. |
|-------------------|---|
| CCTV and Flushing | 1,900 metres of mainline storm sewers were |
| | flushed and CCTV in 2023. |

Inquiries and Complaints

The Town received Seventeen (17) complaints during the reporting period, related to the West Lincoln Stormwater System. The types of complaints and corresponding steps taken to address them, are described in Table D.

Table D – Summary of Complaints

| Complaint Type | Location of Issue (Owner) | | Resolution |
|----------------------|---------------------------|---------|--|
| | Public | Private | |
| Catch basin blockage | 4 | - | Staff responded and removed debris as required. |
| Culvert blockage | 9 | - | Staff responded and removed debris as required. |
| Culvert replacement | 1 | - | Staff inspected culverts and replaced as required. |
| Ditch blockage | 3 | - | Staff responded and removed debris as required. |

Summary of Alterations to the Authorized System

Table E summarizes the projects that saw alterations to the collection system. There were no authorized alterations to the Stormwater System in 2023. Capital projects from the reporting period were related to water and road infrastructure.

Table E – Summary of Alterations to the Authorized System

| Alterations to the Authorized | Project Details | Does this Project Pose a |
|-------------------------------|-----------------|----------------------------|
| System (Project Name) | | Significant Drinking Water |
| | | Threat (SDWT)? |
| N/A | N/A | N/A |

Summary of Spills or Abnormal Discharges

There were zero (0) environmental incidents such as spills or abnormal discharges from the stormwater system to be reported for 2023.

Table F – Summary of Stormwater Spills or Abnormal Discharges

| Overflow | SAC | Date | Volume (m3) | Adverse impacts / Corrective |
|----------|----------|------------|--------------|------------------------------|
| or Spill | Incident | mm-dd-yyyy | and Duration | Actions |
| Location | Number | | (Estimate) | |
| N/A | N/A | N/A | N/A | N/A |

Summary of Actions Taken to Improve System Performance

Table G summarizes the capital and operating projects undertaken during the reporting period.

Table G – Summary of Performance Improvements

| System Performance Improvement | Project Description | |
|--|---|--|
| Stormwater Management Facilities and Oil | A consultant was retained to undertake | |
| and Grit Separator Sediment Assessments | sediment surveys and condition assessments | |
| | at Town owned Stormwater Management | |
| | Facilities (SWMFs) and Oil and Grit Separator | |
| | (OGS) units. | |
| | | |
| | The objective of the assessment was to | |
| | determine sediment removal and | |
| | maintenance requirements. | |

Previous Reporting Year Update

This section of the report highlights the ongoing work within the Township of West Lincoln to improve its stormwater management system. As this is the inaugural year for the CLI-ECA Annual Performance Report, there are no pre-existing actions or projects to update. New goals and objectives are being developed internally and there will be quantifiable and tangible action items reviewed in the 2024 Performance Report.

Public Reporting

The Stormwater Management System Performance Report will be communicated to the system owner (Council) and posted on the Town's website and made available for public review (free of charge) at Town Hall.

Report Date: May 5, 2023

Tray Benish

Manager of Operations
